

SECURITY

Elite provides consulting, design, installation and maintenance services for complete security and emergency managed solutions to both government and corporate facilities facing security threats. Deter-Detect-Delay-Assess - Response solutions for your security is our focus.

The Elite team offers services for risk and vulnerability assessment; integration of perimeter defense; design/build projects; manufacture and supply of vehicle barriers, secure gates and bollards; supply and installation of all camera and detection devices; project and construction management; installation with on-going maintenance.

Our security team is focused on providing turnkey solutions for the protection of assets critical to federal, state, and local government or commercial operations. Our industry best processes allow us to rapidly deploy the solutions required for critical infrastructure protection. Our teams focus will be a site-specific comprehensive security and emergency management solutions, designed to mitigate threats, support preparedness, response and rapid recovery.

From vulnerability assessment, through design, installation and our Prevention Plus maintenance program, we integrate process, technology and construction of physical security systems including perimeter protection, access control, surveillance, force rated gates, lighting and other solutions designed to protect your operation. We are licensed to provide security by the Virginia Department of Criminal Justice Services.

ELITE

A Better Solution. Every Day.
